<p><u>Employment Report:</u> Employment Credit Reports helps you make better employee hiring decisions by quickly and cost-effectively providing objective and factual credit information. Credit information provides insight into an applicant’s integrity and responsibility toward his or her financial obligations.</p>

Service Description

Employment Credit Report - 2 System Bi-Merge: Reliable and timely access to consolidated employment credit information from Experian and TransUnion combined into an easy-to-read proprietary report. The Employment Credit Report is specifically designed to give you the pertinent information needed to help make decisions quickly and easily when deciding on potential candidates or re-evaluating current employees. It shows a comprehensive credit history and provides public record information, plus other items individuals don't typically include in job applications. By revealing potential patterns of inability to meet obligations, this report can also help identify applicants or employees who may be financially overextended. The format is also more descriptive than a standard credit report to help interpret the data and make quick, consistent decisions.

Employment Credit Report - 3 System Tri-Merge: Provides consolidated consumer credit information from all three credit bureaus combined into an easy-to-read proprietary report. The Employment Credit Report is specifically designed to give you the pertinent information needed to help make decisions quickly and easily when deciding on potential candidates or re-evaluating current employees. It shows a comprehensive credit history and provides public record information, plus other items individuals don't typically include in job applications. By revealing potential patterns of inability to meet obligations, this report can also help identify applicants or employees who may be financially overextended. The format is also more descriptive than a standard credit report to help interpret the data and make quick, consistent decisions.

Credit Monitoring: Tri-merge credit report and credit scores along with one year of unlimited access to your TransUnion credit report and *VantageScore*[®] credit score by TransUnion. The daily three-bureau credit monitoring service notifies you if there are any critical changes to your credit files at TransUnion, Experian and Equifax, including fraud alerts, new inquiries, new accounts, new public records, late payments, change of address and more. The service also includes Dark Web-Internet monitoring, access to an identity restoration program that provides assistance in the event your identity is compromised to help you restore your identity and up to \$1,000,000 in identity theft insurance with no deductible. (Policy limitations and exclusions may apply.)

Continuous Evaluation: Continuous Evaluation: Foundational Analysis using public records, credit, and social media data. The Foundational Analysis creates a baseline of essential data for an employee pool to determine the behavior model of the employee population. This behavior model is projected in a dashboard, which allows Security to easily view the collective behavior of the employee population. Trigger Analysis looks for determined triggers in public records, credit, and social media activities on a continual basis. Results are delivered to Security Office once a trigger has been met.

Reference Update Manual: Provides credit data and reports that are not available through the automated systems. In some cases, Verato must run the credit search manually and transmit the data in the proper report format.

Decode Subscriber Database Search Online: Verato provides a secure online database that accommodates and supports personnel with access to creditors, courts, and the addresses related to each specific subscriber code(s).

Service Description
<p><u>Comprehensive Reports</u> is the latest version of the search and locating technology that revolutionized individual and corporate investigations. Public record reports provide a fast and effective way for Federal, State, and local Governments to search, identify, verify, and locate individuals and businesses.</p>
<p><u>Canadian Credit Reports:</u> This is a report comprised of data received from a CRA based on Canadian data.</p>
<p><u>Public Records Reports:</u> Public records that can appear on your credit report include bankruptcy, judgment, or a tax lien. In some states, foreclosure and repossession are also public records.</p>
<p><u>Consent Based Social Security Verifications (CBSV):</u> SSN verifications cross-check against the Subject’s SSN, name and date of birth and provide a death indicator if results indicate the Subject is deceased.</p>
<p><u>Verato LINK™:</u> Verato MPI uses referential matching to deliver a quantum leap improvement in patient matching accuracy. It offers the scalability, security, and simplicity of a SaaS solution built for the cloud, and can be deployed rapidly to support any initiative.</p>

Service Contract Labor Standards (SCLS) is applicable to this contract as it applies to the entire Multiple Awards Schedule and all services provided. While no specific labor categories have been identified as being subject to SCLS due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CFR 541.300), this contract still maintains the provisions and protections for SCLS eligible labor categories. If and / or when the contractor adds SCLS labor categories / employees to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS matrix identifying the GSA labor category titles, the occupational code, SCLS labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
